

**For Override Only**  
**(Due to Guidance office no later than May 1<sup>st</sup>)**

You are strongly encouraged to follow the recommendations of your child's teachers and counselor regarding course selections. However, if you wish to continue with the override process, please provide the information requested below and return the form to the Guidance office. If necessary, you will be contacted by the appropriate Lakota West teacher (or department chair) for a conference. The conference is intended to provide you with advice and information that can assist you in making the most appropriate choice for your child's academic placement. ***Please understand, your son/daughter will be required to remain in the requested course through 1<sup>st</sup> semester exam and since this placement would be the result of an override, your son/daughter will not be permitted to drop down to the originally recommended course during the 1<sup>st</sup> five days of the 1<sup>st</sup> semester without any consequences.***

\*If grade is not 70% or above in 1<sup>st</sup> semester, student will be recommended to drop to a lower level course.

Department Chair (or designee) \_\_\_\_\_ Meeting Date \_\_\_\_\_

AP Teacher signature \_\_\_\_\_  
(if requesting to override into an AP course):

Science and Math Co-Requisites: When a student overrides into a math course that is a co-requisite for a science course (Honors Pre-Calculus/Honors Physics; AP Chemistry/Calculus; AP Physics/AP Calculus AB or BC) and the student later drops that math course, or lowers math levels, the science course level must be lowered at the same time (or dropped, if no lower level is available), regardless of the student's current grade. This could result in a drop with a failing grade.

Notes/Suggestions:
